

5 WAYS TO HELP AVOID COSTLY A/C REPAIR

Hembree[™]
HEATING & AIR CONDITIONING

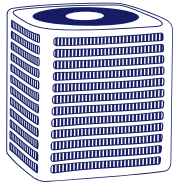

HERE ARE THE TOP 5 WAYS TO AVOID COSTLY A/C REPAIRS AND KEEP YOUR A/C RUNNING EFFICIENTLY.

1) REGULARLY REPLACE OR CLEAN AIR FILTERS EVERY 1-3 MONTHS. THIS PREVENTS THE SYSTEM FROM OVERWORKING DUE TO RESTRICTED AIRFLOW, WHICH CAN LEAD TO BREAKDOWNS.

2) KEEP VENTS AND RETURNS UNBLOCKED TO ALLOW FOR PROPER AIR CIRCULATION, HELPING YOUR SYSTEM MAINTAIN BALANCED AND EFFICIENT OPERATION.

3) MAINTAIN CLEAR SPACE AROUND OUTDOOR UNITS BY REMOVING DEBRIS, LEAVES, AND PLANTS. KEEPING A CLEARANCE OF AT LEAST 2 FEET AROUND THE UNIT ENSURES IT OPERATES EFFICIENTLY.

4) USE A PROGRAMMABLE THERMOSTAT PREVENTS THE SYSTEM FROM RUNNING EXCESSIVELY WHEN IT'S NOT NEEDED, REDUCING WEAR AND TEAR.

5) CONDUCT SEASONAL A INSPECTION. CHECKING FOR LEAKS, THE CONDITION OF THE OUTDOOR UNIT, AND LISTENING FOR ANY UNUSUAL NOISES. THIS CAN HELP CATCH ISSUES EARLY BEFORE THEY REQUIRE URGENT ATTENTION.
